

Randal Edin Ramirez Rosas

Full-Stack Software Developer

Jalisco, México • 3314388604 • randal.rmz@outlook.com • <https://randal.orbu.mx/en>

Software Engineer with 3+ years of experience developing web applications, including e-commerce platforms and marketing-focused landing pages designed to drive customer retention. Proven experience in **SEO**, successfully ranking brands on the first page of search engine results. Core technical stack includes **Java, React, JavaScript, and TypeScript**, complemented by frameworks such as **Spring Boot, Next.js, and Express.js**. Proficient in relational databases (**PostgreSQL, MySQL**) and DevOps technologies, continuously optimizing development workflows leveraging AI coding agents like **Claude Code and Codex**.

EXPERIENCIE

Psicosmart

Junior Web Developer

Jalisco, México

December 2024 – June 2026

- Developed marketing and customer retention-focused landing pages using **PHP**, applying UX/UI design best practices, responsive layouts, and lead capture forms.
- Optimized the performance and mobile experience of existing pages, reducing load times by 20% and improving Core Web Vitals metrics.
- Refactored backend **PHP** and **JavaScript** code to improve data collection and transmission flows, reducing latency in frontend communication.
- Implemented on-page and technical SEO improvements, successfully ranking products and landing pages in the top 3 search engine results pages (SERPs), including visibility on AI-powered search engines
- Conducted comprehensive testing to enhance both code and product quality prior to production releases.

Mondasi

Intern Software Developer

Jalisco, México

June 2024 – August 2024

- Designed and developed the corporate website from the ground up using **Next.js** and **Tailwind CSS**, applying UX principles to enhance the end-user experience.
- Integrated the **JavaScript/React** frontend with the **Node.js** backend via RESTful APIs, ensuring a consistent and reliable data flow.
- Designed and implemented a **PostgreSQL** relational database and deployed it on **Google Cloud (GCP)**, establishing the foundational data infrastructure for the company.

Prolimk

Junior Software Developer

México, México

January 2023 – June 2024

- Built a **Next.js** landing page integrating registration, checkout, and multi-channel contact modules, successfully increasing conversion points across the sales funnel.
- Implemented a fully-featured e-commerce system with a shopping cart, diverse payment methods, and real-time order tracking, designed for independent, manual management by administrators.
- Integrated the **Stripe** payment gateway API—featuring a custom checkout form and secure webhook handling—and incorporated automated shipping logistics by consuming the **envia.com** API.
- Developed a **Next.js** admin dashboard for comprehensive user, product, and order management, significantly reducing the team's operational workload.
- Designed and developed a RESTful API using **Java** and **Spring Boot**, incorporating **Spring Security** for role-based access control (RBAC) to handle user authentication and endpoint authorization, connected to a **PostgreSQL** database.
- Implemented multimedia content management for product catalogs and internal operations utilizing **Cloudinary**.
